

## **Company Profile**

TechFeat Consulting, an India based IT solutions company with over 18 years of experience servicing local & global clients. It's been supported by a good talent pool, has been empowering its clientele with path breaking IT & aesthetic Web solutions & Software Applications.

We provide full cycle services in the areas of Software Development, Mobile Apps, Web Based Enterprise Solutions, Applications and Portals Development.

Combining our solid business domain experience, technical conversance, profound knowledge of latest industry trends and quality-driven delivery model, we have been delivering solutions that go beyond meeting customer delights.

# Overview

## // Who We Are?

TechFeat Consulting is an established IT Solutions company delivering software applications and web development services of any complexity to clients worldwide. Being in IT business for over 18 years now. TechFeat has a strong team of skilled & experienced IT experts.

Our domain expertise and technological ability span across a very broad spectrum. Some of our business verticals include engineering companies, educational institutes, logistics services, realestateand financial sectors.

## // Our Strengths

- One-stop IT Solutions Vendor
- Thorough understanding of business and technology
- Dedicated, competent and technologically enriched team
- Commitment to quality

## // What We Do?

TechFeat Consulting delivers comprehensive web services ranging from custom website design to development of complex Internet systems. Clear understanding of clients' business requirements combined with our domain expertise and technological astuteness, helps us provide expected solutions.

We deliver high quality, cost-effective results giving you competitive advantage and productivity.

## // Our Business Philosophy

We at TechFeat Consulting work in partnership with our clients to create solutions that build tangible long term value for brands, business and culture for them. We deliver solutions that go beyond meeting customer expectations helping them succeed in a constantly changing and challenging biz world.

Our fundamental company values stem from understanding that our success is tied with success of our clients. Our key business principles are:

- Understand Clients' Needs
- Partner with Clients
- Earn Clients' Trust and Confidence

## Consistent Performance and Sustained Growth are proof enough of our capabilities

### // Deep Understanding of Business Principles

Our cumulative knowledge of business and technology helps us arrive at practical (yet aesthetic) solutions that are business result oriented.

We have the know-how to develop solutions like building-blocks that can be seamlessly integrated to expand to meet your growing needs.

### // Commitment to Quality to our Clients

Our development methodology takes quality checks completely into its folds. We consciously invest time and efforts to deliver solutions that are have been thoroughly vetted for quality parameters.

We balance delivery schedules, costs of development and quality without compromising on any of them.

### // Technological Strengths

Our technological expertise spans breadth and depth. Capitalizing on our design strengths, we develop solutions that are not just robust, secure and functionally correct; they come with the added advantage of aesthetic and user-friendly interfaces.

Our repertoire includes customized solutions, customizations of third party and open source software and migrations.

### // Perfection in Design Principles

Our commitment to deliver quality solutions that surpasses customer expectation, begins early in the project life cycle i.e. in the design phase. Our scientific approaches to design coupled with close user interactions and walk-thru, eliminate design glitches which could prove very expensive, if discovered later.

This coupled with practical and intuitive inputs, we include attributes to enhance user experiences, easy maintainability and scalability, at this early stage itself. Indeed, small acorns grow into great oaks!

# Methodology

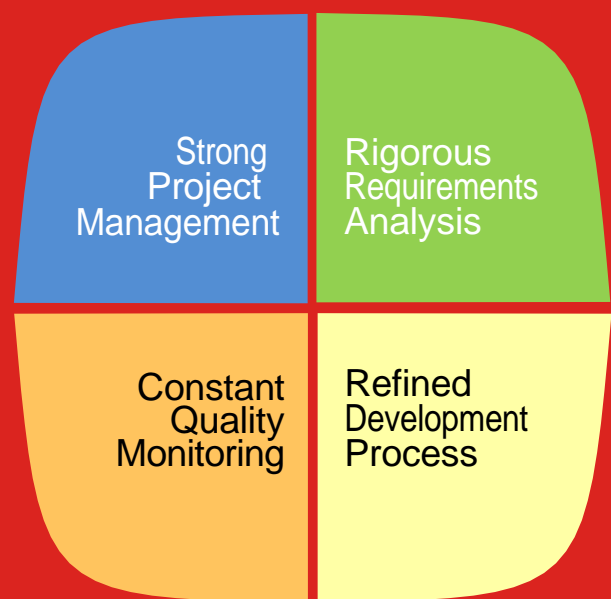

Driven by Agile methodology, TechFeat adapts and fine tunes its processes to deliver best results.

We have been consistently delivering quality primarily due to the strengths we derive from the robust methodology followed across the organization.

Deriving experiences from the numerous projects across verticals and technologies, we have arrived at best practices.

The openness in our working environment encourages our teams to share knowledge and experiences.

The main foundations of our methodology are:

# Capabilities

TechFeat delivers robust IT solutions loaded with features that surpass customer expectations.

Our strengths come from thorough understanding of technology, perfection in design principles and ability to understand customer needs. So, our solutions deliver results and are innovative to cover future needs.

## Technologies

### // Open Source

TechFeat offers a range of development, customization and implementation services of open source be it from one of the above or something which you might need to be built from the scratch. TechFeat Consulting has the tools, processes and experience necessary to develop innovative open source software products quickly and cost effectively. We have core competency in Open Source Software development and have been offering Open Source Software driven solutions to our clients since our operations started.

### // PHP

TechFeat technical team has accumulated experience and understanding to work PHP with relational databases like MySQL on different platforms. LAMP (Linux / Apache / MySQL / PHP) platform is an effective alternative to commercial software for building and running dynamic and high performance web systems. We leverage the time and cost saving advantages of open source technologies to deliver cost-effective information enriched website/portals to full-blown scalable web solutions through engagement models most suited for your requirement.

### // AJAX

TechFeat harnesses the power in AJAX related technologies to create applications that are characterized by modularity, ease-of-maintenance and seamless integration of new functionality. AJAX combined with DOM (Document Object Model) renders request/response in a non-interference mode. Capitalizing on this advantage, our solutions are assured of quality and optimal utilization of resources.

### // Web

With broad experience gained over 18 years of our operations, TechFeat is geared to help you meet the requirements of the new generation of the Web delivering:

- Next-generation Portals
- Rich Internet Applications
- Composite Applications
- Software as a Service Applications
- Enterprise Mash-ups

### // Rich Internet Applications

Increased demand on enhanced web-users experiences together with interactive software development evolved into appearance of Rich Internet Applications (RIAs). RIAs, according to Adobe definition, are applications that combine improved user interface and functionality of desktop software, accessibility and low-cost deployment of web-based applications and the best of interactive, multimedia communication. Compared to standard HTML-based applications, RIAs empower your business with solutions that are more consistent, targeted, responsive and intelligent. Team TechFeat offers solutions that give your users enhanced user-experiences thereby giving you an edge over your competitors.

# Solution Expertise

- Microsoft Platform
- Open Source Software
- Web Applications
- Mobile Applications
- Dynamic Websites
- Digital Marketing
- Cloud Solutions
- AWS
- Analytics
- Membership Management
- Electronic Newsletters
- Mailing Systems
- Integrated Search
- Blogs
- Polls and Surveys

# Skill Sets

## PROGRAMMING LANGUAGE/TECHNOLOGIES

- Microsoft Tech (ASP.NET, C#, VB .NET)
- PHP
- AJAX
- JavaScript
- VBScript
- Ruby on Rails
- C/C++
- ColdFusion/Perl
- Flash
- COM/DCOM
- CSS
- SOAP
- SSL
- MAPI, TAPI, SAPI
- HTML/DHTML, XHTML
- XML/XSLT
- VML
- OLE, ActiveX
- TCP/IP, HTTP/FTP, SMTP, POP3, IMAP

## WEB & APPLICATION SERVERS

- Tomcat
- Microsoft IIS
- Apache
- MS Exchange Server

## DATABASES

- MSSQL
- MySQL
- Oracle
- PostgreSQL
- MS Access

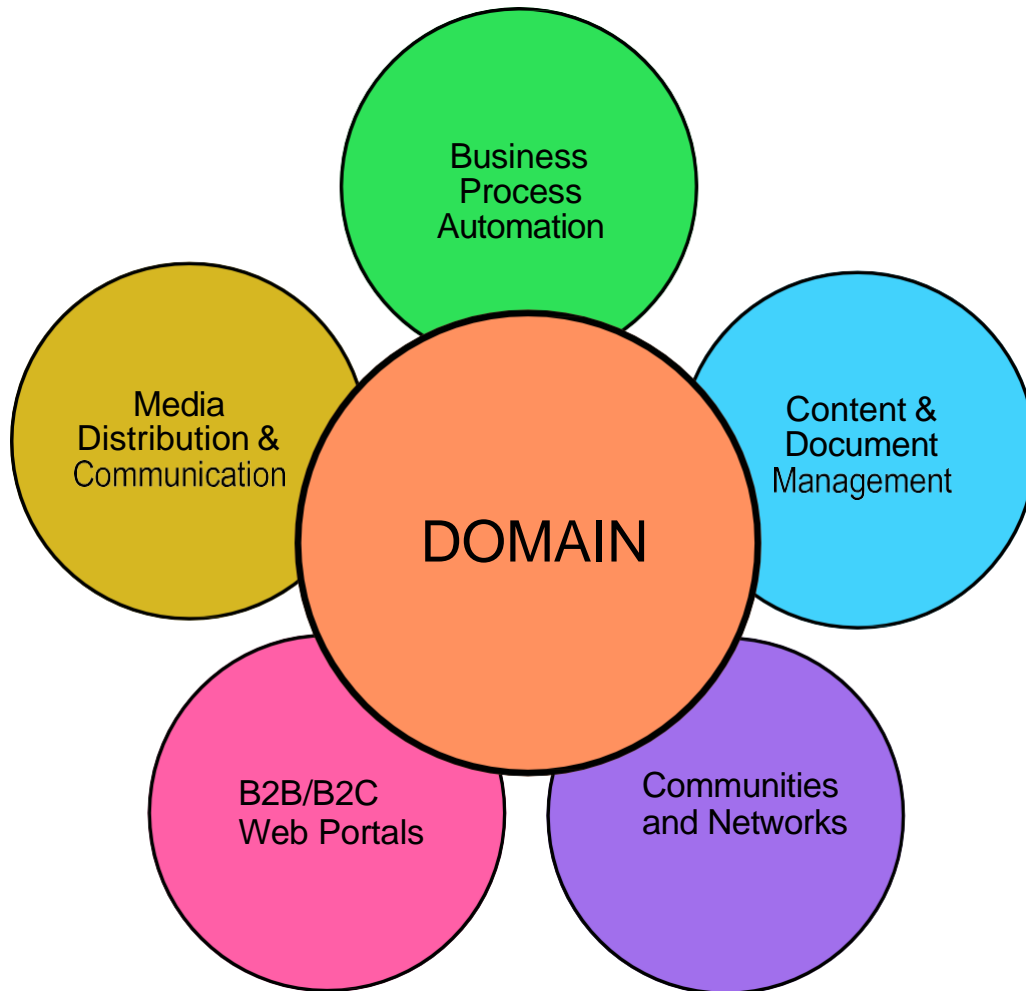

## OPERATING SYSTEMS

- Windows 9x/2000/CE/ME/NT/XP
- Linux
- FreeBSD
- All Mobile OS
- Ubuntu

# Domain Expertise

Through 18+ years of experience TechFeat has built a solid knowledge base in various business domains:

## // Business Process Automation

- Customer Relationship Management

# Quality Management

TechFeat has always taken an uncompromising position in respect to quality. TechFeat's Quality Management System (QMS) is a complex set of engineering and managerial activities that ensures the delivery of high quality software through the entire workflow. The experiences from the project are ploughed back to refine the process. Continuous improvements help us meet milestones with no compromise on quality.

## TechFeat QMS Tasks and Objectives

- Elaboration and implementation of procedures and regulations for software development process based on the industry best practices and standards
- Product life-cycle monitoring to ensure compliance with established processes and guidelines
- Product quality verification and validation to ensure its correspondence with the client needs and expectations
- Establishment of an effective collaboration of all production participants

## Independent QA Department

TechFeat's QA department is an independent structural subdivision. The QA team consists of skilled QA engineers and experienced testers dedicated to a project or assigned based on requirement. The allocation of QA engineers depends on the project size and complexity. Being an independent body, they are free from pressures from the development team.

## Key Processes

- Full-cycle QA Testing
- Document and Code Reviews
- Defect Tracking
- Configuration Management
- Process Monitoring
- Risk Management

QA process includes different types of tests to ensure increased QA depth

- Functional and Regression Testing
- GUI and Usability Testing
- Accessibility Testing
- Compatibility Testing Performance
- Testing Installation/Configuration
- Testing System/Integration Testing
- Security Testing
- Internationalization/Localization Testing
- User Acceptance Testing (UAT)

As we put our customer satisfaction first, we always strive for better results constantly improving our QA methods and procedures.

## Outsourcing

It is a challenge to keep track of emerging technology and deploy it effectively to fuel your growth. Outsourcing helps you manage this challenge. TechFeat is an ideal partner who can help you meet this ever-growing challenge of integrating technology with your business needs.

TechFeat offers a full range of software outsourcing services from end-to-end development of new software and web solutions to re-engineering and enhancement of legacy applications, application integration and on-going maintenance and support. Our vast pool of seasoned professionals with diverse skills is available to clients on a dedicated or as-needed scheme. TechFeat puts special emphasis on training and keeping the team updated with the latest technologies, industry standards and the best software development practices.

Key Benefits of Outsourcing to TechFeat are:

- Access to Expertise
- High-Skilled Team Flexibility and Scalability Confidentially and Intellectual Property Protection
- Cost Savings
- Seamless Communication
- Location Advantage

## Dedicated Team

TechFeat offers you an option to invest in IT without the overheads of office-space, hardware or software. Dedicated offshore development model is an engagement model that lets you choose our financial outlay and timelines. This model offers you a team of efficient developers and infrastructure (that you choose) who are dedicated to your project for a time span decided by you. This is a very secure, scalable and flexible option.

### The facilities offered include:

- Option to start with one dedicated expert
- Possibility for pre-screening each DDC team member
- Vast pool of IT resources with diverse skills
- Complete control over the team structure (involvement / replacement/ withdrawal)
- Team working time adjustment for your time zone
- Rapid team scaling / involvement of specific subject matter experts on an ad hoc basis
- Ready to use IT infrastructure
- Adoption of your process and methodologies upon requirements
- Transparent process and comprehensive reporting
- Complete control over your projects flow (requirements/ schedules/ deliverables/ priorities)
- Established intellectual property protection procedures and mechanisms

## Engagement Models

TechFeat offers different pricing models to meet global clients' diverse needs.

- Fixed Time / Fixed Price
- Time & Material
- Milestone Billing
- Dedicated Development Team

We also understand that customers are increasingly demanding the flexibility – we can customize a model to address your specific needs.
